

METHOD, SYSTEM, AND PROGRAM FOR ELECTRONICALLY MAINTAINING
MEDICAL INFORMATION BETWEEN PATIENTS AND PHYSICIANS

ABSTRACT

Disclosed is a method, system, program, and data structure for maintaining
5 electronic patient medical information. An electronic patient data structure is generated
to include patient biographical information and one of medical history information,
medication schedule information, and appointment schedule information. The patient
data structure is electronically transmitted between a physician computer and a portable
patient device. The patient data structure is capable of being modified.
